

Action Learning Pitch CS2

Project: SWEEPER: PDF Scanner

- **Hook**

Did you know that 66% of successful cyber attacks were initiated through an infected pdf document? In 2021 a new virus called Snake Keylogger was used to steal millions of passwords and sensitive data. I'm sure you guessed it already, the virus was spread through a pdf document.

- **Pitch**

That is why you need a defense in depth approach to protect yourself from such attacks.

Our scanner Sweeper is the guy for the job, it automatically scans and isolates any downloaded PDFs by checking it against a broad and updated database of known viruses and in depth analysis of the document for any anomalies.

If there is a threat it will detect and isolate it!

Don't be a victim of the next cyber attack.

Save your precious time, money, and most importantly reputation.

- **Call to Action**

Reach out to us today for a demo and discover how Sweeper can be your ultimate shield against cyber threats.

Presentation Schedule

Time	Activity
1min 30 secs	Pitch
3 mins	Demonstration
2 mis 30 secs	Wrap-up
